Sorry!
Here is the link.

They moved the questions and answers around. It's now question #2 - **When did EPA first learn of this contamination? What steps have been taken since initial PFAS discovery in the pesticide product?**

Thuy

Our briefing relates to the TSCA regulatory decisions and next steps. Were you thinking of something different?

I think you forgot the link?

Hi James

We did so many briefing on this subject, and I am sure I had such document. But I can't find it.

Here is a link to the OPP website regarding our work on PFAS. Answer to question #9 did address the time line regarding our work. Hope it helps.

Also, Kimberly wants to know if we can do a joint briefing to the AA's with you on this. Let us know

Thanks

Thuy

Hi Thuy –

Hope you are doing well! I am wondering if you have a briefing paper or some document that outlines the chronology of your team's work since you starting testing the fluorinated/non-fluorinated containers. We're preparing for a joint briefing with OPPT for our respective AAs, and it would be helpful to include those data points in our background paper.

James
